

**Dr. Geoffrey Bryant N.D., PhD (Honorary)**  
**Doctor of Natural Medicine**

**Professional Evaluation Report**

**Good Water Group Filtration Systems**

**Prepared by:**

Dr. Geoffrey Bryant  
Doctor of Natural Medicine  
40 Years Clinical Experience  
Specialist in Allergy & Reactivity Testing

**Background**

As a practitioner with four decades of clinical experience in natural medicine, and a specialist in allergy and reactivity testing, I routinely assess environmental and consumable substances for biological compatibility and stress responses.

Recently, I conducted an evaluation of this newly installed Reverse Osmosis (RO) Water Filtration System using my **Mora Super Bio-resonance device** in substance testing mode.

**Testing Method**

The filtered water sample was assessed using bio-resonance evaluation procedures commonly employed in my clinical practice to:

- Detect potential bio-reactive stress patterns
- Assess compatibility with human physiology
- Identify potential reactivity signatures
- Evaluate general energetic tolerance

Testing was conducted under controlled conditions using standard substance testing protocols.

**Observations & Findings**

The filtered water sample demonstrated:

- No detectable bio-reactive stress signatures
- No identifiable reactivity patterns commonly associated with chemical or environmental stressors
- Strong compatibility response in comparative tolerance assessment
- Stable and well-balanced energetic profile

From a bio-resonance perspective, the filtered water tested as:

- Clean and physiologically compatible
- Well tolerated by the body
- Free from detectable adverse reactivity patterns

No adverse resonance indicators were observed during testing.

**Professional Opinion**

Based on my clinical assessment and bio-resonance testing experience, this reverse osmosis filtration system produces water that demonstrates a high level of biological compatibility and tolerance.

In my professional opinion, the filtered water is suitable for regular consumption as part of a healthy lifestyle.

**Statement**

“In my 40 years of clinical experience working with allergy and reactivity testing, I was impressed with the results of this reverse osmosis system. The filtered water demonstrated excellent compatibility in

bio-resonance testing, with no adverse reactivity detected. I would consider this a high-quality filtration solution for individuals seeking clean, health giving, and well-tolerated drinking water.”
